

**POCKETED BEDDING OR SEATING PRODUCT HAVING STRINGS OF
SPRINGS WITH VERTICALLY OFFSET POCKETS**

Abstract of the Disclosure

A bedding or seating product is provided comprising a pocketed
5 spring assembly made up of a plurality of parallel strings of springs joined to
each other. Each string of springs comprises a row of interconnected
pocketed springs. The pockets of fabric are vertically shortened with seams
to create pockets of the same height, each containing a spring. The springs
are vertically offset from one another due to the location of the seams. Upon
10 an initial load, only some of the pocketed springs are compressed.
